Product Description

Product Description:

Our **PVC foil** is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material renowned for its *durability, flexibility, and ease of processing*. It is available in a wide range of colors, patterns, and textures, ranging from natural materials such as wood, stone, fabric, or metal, to more creative options.

This foil exhibits versatility, as it can be applied to a variety of surfaces, including interior doors, cabinets, furniture, walls, etc. It adheres well to different substrates and is suitable for most interior applications. Because of its superior resilience to wear and tear, and its strength, it is frequently used in high-traffic locations.

In terms of maintenance, our PVC foil requires little yet regular upkeep. It is simple to maintain and usually just needs to be wiped down with a moist cloth once a week. It also offers great value for money as it enables creating upscale aesthetic designs at a fraction of the cost of natural materials. Additionally, it can be modified to meet personal design preferences and project specifications with a wide range of styles and finishes from manufacturers.

Finally, the PVC foil is extensively used in residential and commercial areas for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Product Specification

Our products come with a variety of specifications, meeting different customer requirements.

Thickness: our product range from 0.1mm to 0.5mm.

Width: We provide 1260mm and 1400mm.

Length: We offer 100m to 400m per roll.

Design: We have various designs including woodgrain, solid color, marble, brick and many others.

Surface treatment: We offer a variety of options like matt, super matt, embossed, high gloss, soft touch and others.

Service: We provide OEM and ODM services.

Applications:

Membrane Press (vacuum press) is suitable for covering on MDF, particleboard, wooden board, fiberboard, etc and is applied for doors, kitchen cabinet, wardrobe, furniture, etc. It can cover embossed boards and five surfaces at the same time with a thickness ranging from 0.20-0.50mm, width of 1260mm or 1400mm and a length of 100-300m/roll.

Wrapping Profiles is applied for all kinds of profiles including wood profile, aluminum profile, PVC profile, etc, such as door frames, window sills, base channels, PVC ceiling and so on. Its thickness is 0.12-0.18mm, width 40-1260mm and length 300-800m/roll.

In comparison, Cold Laminating is best used for covering all kinds of flat panels such as wood panel, steel panel, aluminum panel, PVC panel, etc for doors and furniture. It has a thickness of 0.12-0.20mm, width of 1240-1260mm and length of 300-500m/roll.

Hot Laminating is used for covering PVC panels, steel panels, aluminum panels for doors, skirting and so on with a thickness ranging from 0.16-0.30mm, width of 1260mm and a length of 200-300m/roll.

Lastly, self-adhesive is suitable for putting on any smooth surface for furniture and indoor decorations with a thickness of 0.10-0.20mm, width of 600mm or 1220mm, and a length of 5-50m/roll.
