- Highlight: **Wall Decoration PVC Lamination Film ,
PVC Lamination Film 1260mm,
PVC Lamination Sheet 1260mm**

Product Description

Wall Decoration PVC Laminate Plastic Sheet For Ceiling Panel

Product Description:

This PVC foil is primarily constructed from Polyvinyl Chloride (PVC), a synthetic plastic which is known for its durability, flexibility, and ease in processing. It is available in a wide array of colors, patterns, and textures, which can easily mimic the appearance of natural materials such as stone, wood, fabric, or metal.

The foil is quite versatile and can be used on various surfaces, such as doors, furniture, cabinets, and walls. It adheres well to different substrates and is widely used in indoor locations due to its superior durability and resistance to wear and tear.

This product is simple to maintain as it just requires weekly cleaning with a moist cloth, and is also significantly more cost-effective than many organic materials. Customers can choose from a vast selection of styles and finishes in order to meet their design specifications.

Decorative PVC foil is frequently used for both commercial and residential purposes, such as kitchen and bathroom cabinets, walls, interior doors, retail displays, and furniture. It creates a high-quality aesthetic with an affordable price tag.

Technical Parameters:

Introduction

Our products range from 0.1mm to 0.5mm in thickness, with 1260mm and 1400mm in both width and length. We offer 100~400m/roll of customizable design, including wood grain, solid color, marble, and brick.

In terms of surface treatment, our options include matt, super matt, embossed, high gloss, and soft touch.

What's more, both OEM and ODM service are available upon request.

Applications:

Different application requires different working process. Here are five process with specific details, along with possible applications.

1. Membrane Press (vacuum press)

Thickness: 0.20-0.50mm Width: 1260mm, 1400mm Length: 100-300m/roll

It could be used to cover surfaces of MDF, particleboard, wooden board, fiberboard, etc., such as doors, kitchen cabinet, wardrobe and furniture.

2. Wrapping Profiles

Thickness: 0.12-0.18mm Width: 40-1260mm Length: 300-800m/roll

It is suitable to cover surfaces of all kinds of profiles, such as wood profile, aluminum profile, PVC profile, etc., applicable for door frame, window sill, base channel, PVC ceiling.

3. Cold Laminating

Thickness: 0.12-0.20mm Width: 1240-1260mm Length: 300-500m/roll

This process is applicable to all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc., perfect for doors and furniture.

4. Hot Laminating

Thickness: 0.16-0.30mm Width: 1260mm Length: 200-300m/roll

This process is used to cover surfaces of PVC panel, steel panel, aluminum panel, such as doors, skirting.

4. Self-adhesive

Thickness: 0.10-0.20mm Width: 600mm/1220mm Length: 5-50m/roll

It is suitable to put on any smooth surface, applicable to furniture and indoor decorations.
