- Printing: 1-5Color Printing
- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Pressetc.
- Material: PVC
- Highlight: **Brick Design PVC Membrane Foil, Matt Surface PVC Membrane Foil, 1-5Color PVC Membrane Foil**

Product Description:

Material:

The main ingredient of our pvc foil is Polyvinyl Chloride (PVC), a synthetic plastic with excellent strength, flexibility, and processing simplicity.

Appearance:

We offer a variety of colors, patterns, and textures for our pvc foil. It can imitate the appearance of real materials like wood, stone, cloth, or metal, making it more affordable while maintaining a premium look.

Adaptability:

Our foil is suitable for a wide range of surfaces, including walls, doors, cabinets, and furniture. It can be effectively applied in various interior spaces.

Durability:

Realsun Deco PVC foil is known for its strength and resistance to deterioration, making it a popular choice for high-traffic areas.

Maintenance:

After installation, our pvc foil only requires minimal maintenance. Simply clean it once a week with a wet cloth.

Economical:

Pvc decorative foil is a cost-effective option when compared to natural materials, allowing for sophisticated aesthetics without the associated costs.

Modification:

Manufacturers offer a wide variety of styles and finishes, making it possible to modify our foil to satisfy project requirements and individual design preferences.

Application:

Decorative pvc foil is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other residential and commercial applications.

Applications:

Membrane Press

The membrane press is used to cover various materials such as MDF, particle board, wooden board, and fiberboard. It is commonly used for doors, kitchen cabinets, wardrobes, and other furniture.

Wrapping Profiles

Our wrapping profiles can cover a wide range of materials including wood, aluminum, and PVC profiles. These profiles are commonly used for door frames, window sills, base channels, and PVC ceilings.

Cold Lamination

Cold lamination is the process of covering flat panels, such as wood, steel, aluminum, and PVC panels. This is mainly used for doors and furniture.

Hot Lamination

Using our hot lamination process, we can cover PVC, steel, and aluminum panels for purposes such as doors and skirting.

Self Adhesive

Our PVC films can also be made into self-adhesive film. This unique product uses PVC decorative film as a base and is attached to release paper using an environmentally-friendly acrylic pressure sensitive adhesive. It can easily and firmly adhere to the surface of furniture and other decorations, making it a simple, convenient, and efficient solution.

Packing and Shipping:

Packaging and Shipping for PVC Membrane Foil

Our PVC membrane foil is carefully packaged to ensure its safe delivery to our customers. Below is a breakdown of our packaging and

shipping process:

Packaging:

Each roll of PVC membrane foil is wrapped in a protective foam sheet to prevent any scratches or damage during transportation.

The rolls are then packed with kraft paper and plastic sheet to provide additional protection.

For larger orders, the rolls are stacked onto pallets and secured with stretch wrap to prevent shifting during transit.

Shipping:

We offer both domestic and international shipping options for our PVC membrane foil. Our standard shipping methods include:

Express delivery via reputable courier services such as FedEx, DHL, or UPS.

Standard shipping via sea freight for larger orders or international shipments.

Our team carefully tracks each shipment to ensure timely and accurate delivery. We also offer the option for customers to arrange their own shipping if preferred.

We take great care in packaging and shipping our PVC membrane foil to ensure it arrives in perfect condition. If you have any special packaging or shipping requests, please contact us and we will do our best to accommodate your needs.
